# RT200

## ***Introducing the Tandem<sup>®</sup> RT200 Friction In-Bay Automatic*** ***Perfect for locations looking for all the competitive distinction of the*** ***PDQ Tandem<sup>®</sup> with a simpler options configuration and a lower price!***

The Tandem<sup>®</sup> RT200 provides the same innovation, quality clean, customer wash experience and operator profitability the industry has come to expect from Tandem<sup>®</sup> by offering standard features common to all Tandem<sup>®</sup> equipment including:

- Two bridges
- Two brushes—foam top and side brush
- Widest top brush in the industry
- Open bay, patented Virtual Treadle<sup>®</sup>
- 34' rails
- Fresh water rinse through rain arch, rinse with drying agent
- Spot-free delivery through rain arch
- Cross beam rail mounting
- E-chains for fluid and electrical supply
- Bay control box with conductor
- Reclaim and RO capable

### ***Optional features include:***

- 3x Foam
- Low pressure drive-thru undercarriage
- Rust inhibitor
- 2, 3, and 4 producer on-board dryers and FlashDry<sup>™</sup> system
- Free standing frame
- Basic wheel scrubbers\*
- Ultimate cover package
- Stand-alone MaxAir<sup>™</sup> Dryer

The Tandem<sup>®</sup> RT200 design is simplified by incorporating no pumps and all services are applied via city water pressure. Presoak and sealer wax completely coat the vehicle from the bridge above and do not require contouring side arches.

***The Tandem<sup>®</sup> RT200 Friction In-Bay Automatic is perfect for auto dealers, convenience stores and multi-site operators looking to streamline their operations or offer a simplified portfolio of services to their customers.***
